DETAILED ACTION

Reasons for Allowance

Applicant has support for the following practical applications in the following lines from the Specification. Specifically, page 20, lines 7-21 defines "terminological information" as:

The integration of user specified terminological information into a built-in knowledge base has application for use in specific domains. For example, an English language newspaper in India may buy a natural language processing system (e.g., Oracle® ConText®) to provide a search capability for their on-line edition. However, the newspaper agency may find that the built-in knowledge base has little or no knowledge of Indian politics and economics. For this hypothetical, the user desires to extend the built-in knowledge base to include terminological information on Indian politics and economics. The built-in knowledge base (e.g., knowledge base 155) has a category for "politics", but all sub-categories associated with this node apply generally to United States politics. For this hypothetical, the India newspaper may build a hierarchy of terms for "Indian politics" under the existing "politics" category in the knowledge base. Specifically, names of major Indian political parties and politicians are organized and represented in the ISO-2788 thesaurus format. Table 3 shows an example input terminological information formatted in the ISO-2788 thesaurus format.

Further, page 2, lines 15-22 recites:

Natural language processing systems, including information search and retrieval systems, may be applied to domain specific applications. For example, a natural language processing system "may process and classify information (e.g., documents) about medicine for a system tailored for the medical profession. For this example, a natural language processing system may compile and classify thousands of documents related to medicine. A commercially available natural language processing system may include a general knowledge base, that includes terminology from a wide range of topics.

This is the practical application for which Applicant has support.

Further, the claims are inherently practiced on a computer since they are claimed as being either "computer implemented methods" or on "computer readable media."

Therefore, the claims are statutory.

Claims 16-17, 19-26, and 28-37 are allowed.

The following is an Examiner's statement of reasons for allowance: Claims 16-17, 19-26, and 28-37 are considered allowable since when reading the claims in light of the specification, as per MPEP §2111.01, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 16, including: an ontology (as defined at page 12, lines 1 through 7 and at page 4, lines 2 through 5 and at page 5, line 22 and at page 7, lines 18 through 21 and at page 10, lines 17 through 19 and at page 11, lines 6 through 13 and at page 12, lines 1 through 7 and at page 13, lines 8 through 9 and at page 15, lines 1 through 9 and at page 21, lines 20 through 26 and at page 22, lines 1 through 6 and at page 22, lines 24 through 26), a logical structure (as defined at page 19, lines 7 through 22 and Fig. 5 and at page 19, lines 1 through 6 and Fig. 4 and at page 18, lines 17 through 22 and at page 21, lines 10 through 26 and Fig. 6a and at page 22, lines 1 through 26 and at page 23, lines 1 through 15 and at page 4, lines 1 through 10 and at page 5, lines 16 through 22 and at page 18, lines 1 through 22 and at page 21, lines 10

through 26 and at page 24, lines 1 through 6), "independence" (as defined at page 7, lines 18 through 21 and at page 8, lines 7 through 10 and at page 10, lines 14 through 22 and at page 12, lines 1 through 22 and at page 15, lines 1 through 5 and at page 22, lines 1 through 6).

Further, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 17, including: an ontology (as defined at page 12, lines 1 through 7 and at page 4, lines 2 through 5 and at page 5, line 22 and at page 7, lines 18 through 21 and at page 10, lines 17 through 19 and at page 11, lines 6 through 13 and at page 12, lines 1 through 7 and at page 13, lines 8 through 9 and at page 15, lines 1 through 9 and at page 21, lines 20 through 26 and at page 22, lines 1 through 6 and at page 22, lines 24 through 26), a logical structure (as defined at page 19, lines 7 through 22 and Fig. 5 and at page 19, lines 1 through 6 and Fig. 4 and at page 18, lines 17 through 22 and at page 21, lines 10 through 26 and Fig. 6a and at page 22, lines 1 through 26 and at page 23, lines 1 through 15 and at page 4, lines 1 through 10 and at page 5, lines 16 through 22 and at page 18, lines 1 through 22 and at page 21, lines 10 through 26 and at page 24, lines 1 through 6), "independence" (as defined at page 7, lines 18 through 21 and at page 8, lines 7 through 10 and at page 10, lines 14 through 22 and at page 12, lines 1 through 22 and at page 15, lines 1 through 5 and at page 22, lines 1 through 6).

Further, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 26, including: an ontology (as defined at page 12, lines 1 through 7 and at page 4, lines 2 through 5

and at page 5, line 22 and at page 7, lines 18 through 21 and at page 10, lines 17 through 19 and at page 11, lines 6 through 13 and at page 12, lines 1 through 7 and at page 13, lines 8 through 9 and at page 15, lines 1 through 9 and at page 21, lines 20 through 26 and at page 22, lines 1 through 6 and at page 22, lines 24 through 26), a logical structure (as defined at page 19, lines 7 through 22 and Fig. 5 and at page 19, lines 1 through 6 and Fig. 4 and at page 18, lines 17 through 22 and at page 21, lines 10 through 26 and Fig. 6a and at page 22, lines 1 through 26 and at page 23, lines 1 through 15 and at page 4, lines 1 through 10 and at page 5, lines 16 through 22 and at page 18, lines 1 through 22 and at page 21, lines 10 through 26 and at page 24, lines 1 through 6), "independence" (as defined at page 7, lines 18 through 21 and at page 8, lines 7 through 10 and at page 10, lines 14 through 22 and at page 12, lines 1 through 22 and at page 15, lines 1 through 5 and at page 22, lines 1 through 6).

Only to the extent that these features (specifically as defined above) are not found in the prior art of record is the present case allowable over the prior art.
